

The figure consists of two side-by-side scatter plots. Both plots have a y-axis labeled 'Proportion of chromosome (in 1000000000)' ranging from 0.00 to 1.00. The x-axis for both plots is labeled 'Chromosome'.

The left plot shows data for 'Chromosome' (blue dots) and 'Autosomal' (grey dots). The 'Chromosome' data points are clustered around a proportion of 1.00, while the 'Autosomal' data points are clustered around a proportion of 0.00. The x-axis ranges from -2.5 to 2.5.

The right plot shows data for 'Chromosome' (blue dots) and 'Autosomal' (grey dots). The 'Chromosome' data points are clustered around a proportion of 1.00, while the 'Autosomal' data points are clustered around a proportion of 0.00. The x-axis ranges from 0.0 to 1.0.
